

## Sumer Meeting 2019 - Program Details

---

**8:00am - 10:00am - Fixed Removable Solutions: From Analog to Digital**

**2hrs Scientific**

**Victor Castro, CDT**

The complexities of fabricating full-mouth prosthetics to be functional but natural-looking can be simplified when the dentist and technician work together to analyze and treat patients. This lecture will provide you with real-life case examples of cooperative dentistry from initial treatment planning to final delivery of fixed-removable dentures and hybrids. Design and processing solutions will be presented to help you streamline your workflow, reduce errors, and manage “pink & white” transitions for an esthetic outcome. A systematic review of starting with a fully functional denture, the blueprint of the end result, and the conversion process to develop a zirconium fixed hybrid framework to support micro-layering for tooth reproduction, tissue replication, and anatomy/texture will also be presented.

**10:00am- 12:00pm - ArgenIS: Implant Solutions- Latest Trends and Techniques in Custom Abutment Innovations**

**2hrs Scientific**

**Steaffani Dall, RDH**

Discussion on part of Argen Technologies introducing future abutments from the Argen Company.

**\*\*\*\*\*Lunch Break 12:00-1:00p\*\*\*\*\***

## Sumer Meeting 2019 - Program Details

---

### **1:00pm-3:00pm - Trouble Shooting Aesthetic Ceramics / Smartphone Shade communication**

**2hrs Scientific**

**Jim Emmonds, CDT**

Learn to start the cases with more usable shade communication info. Plus learn the why & how to manipulate shade adjustments, and easily change anterior axial appearances. Optimize layering bonding and reduce working time by 45 minutes on each case.

Objectives:

- Simplify custom shade communication
- tips on anterior aesthetic contouring
- repairing & adding to Yz frames
- what you can do when the fired
- sintered shade is too dark
